EXPERIENCE

Acuvate, Hyderabad— *Software Engineer*

August 2018 - PRESENT

Bajaj – Admin Services Revamp

Technologies Used: Angular 9, .Net Core Web API, SQL, SSO, JWT, PWA, JMeter for Load Testing

- Revamped a portal built on Angular to serve 30k+ employees
- Improved user experience by making use of PWA to enable offline features and increase page load performance by 30%
- Increased data query response time by 15% by restructuring API
- Improved Security score by fixing vulnerability issues identified using Bug bounty and Checkmarx
- Implemented many other security related features like SSO, JWT Tokens, Recaptcha and Analytics to name a few

Bajaj – DAC

Technologies Used: React JS, SharePoint, SQL, .Net Framework Web API

- Responsible for full stack development of a disciplinary action committee Sharepoint site, now being used by Top level management in Bajaj Finserv
- Developed Business Intelligence reports making Organization level employee behaviour analysis easier

Neptune - Provisioning Tool

Technologies Used: SharePoint, Azure Function Apps/Logic Apps, PowerShell/PnP PowerShell, Power Apps/Power Automate

- Implemented an effective Information Architecture across Neptune by developing an application that allows users to request and provision Sharepoint sites
- Provisioned over 1800 existing sites with Record management features by using Powershell scripts
